

RESOURCE

Energy Field Generator

An **Energy Field Generator** is a fortification with the following profile:

T7 W3 SV 4+/5++

These may be deployed anywhere in your table half. An impassible 5" tall shield is created in a straight line between each pair of your Energy Field Generators within 8" of each other. The shield blocks direct fire but not LOS. You may disable or enable any shield section between a pair of your Energy Field Generators at the start of your movement phase. Declare the starting condition of each before the game begins.
